

Solutions Design Workshop

To cover the objective and components below, a minimum of two days onsite is recommended.

Objective

This workshop empowers customers with the knowledge and tools to make informed decisions about their XR strategy. By working directly with Varjo experts, customers gain hands-on experience, real-time feedback, and tailored recommendations to ensure successful implementation of Varjo's cutting-edge technology.

The Solution Design Workshop is a highly interactive, onsite engagement focused on understanding the customer's goals, identifying their specific use case, and proposing a tailored solution using Varjo's XR technology. This workshop ensures that customers receive expert guidance on implementing Varjo solutions aligned with their unique requirements. By combining in-depth discussions, technology demonstrations, and proof-of-concept development, customers gain clarity on what is possible with Varjo's technology and how it can be effectively implemented to meet their needs.

Outcome

Throughout the workshop, Varjo experts bring their extensive XR expertise to the table, collaborating with the customer to explore possibilities, refine strategies, and shape the best solution for their needs. This dynamic exchange ensures that customers not only gain insights into what's possible with Varjo's technology but also develop a pathway for successful implementation tailored to their objectives.
